

AMENDMENT TO CLAIMS:

Please amend the Claims as follows with additions shown in underline and deletions shown as strikeouts.

1. (CURRENTLY AMENDED) An apparatus for receiving a plurality of programs, comprising:

user interface means for selecting a program from said plurality of programs;

an on screen user option indicating that a user can ~~to~~ both purchase and record the selected program, so that the ~~a~~-user does not have to select one of purchase and record user options and then select the other user option to purchase and record the selected program;

a controller, in response to a first user action for selecting a first program for recording, storing ~~stores~~ said first program in a first list representing a list of programs to be recorded, and in response to a second user action selecting said on screen user option for selecting a second program for both purchasing and recording, storing ~~stores~~ said second program on a second list representing a list of programs purchased and also storing ~~stores~~ said second program on said first list.

2. (ORIGINAL) The apparatus of claim 1 wherein said first list includes a timer conflict indication for programs having a timer conflict.

3. (ORIGINAL) The apparatus of claim 1 wherein said first list includes a purchase indication for said second program.

4. (ORIGINAL) The apparatus of claim 1 wherein said controller first determines whether there is a timer conflict between said second program and another program on said first list before storing said second program on said first list.

5. (ORIGINAL) The apparatus of claim 4 wherein said controller prompts a user to resolve said timer conflict if said timer conflict exists.

6. (CURRENTLY AMENDED) An apparatus for processing a program, comprising:

on screen display means for displaying a first list representing programs selected for recording;

on screen user control option indicating that a user can ~~for selecting to~~ both purchase and record a program, so that the ~~a~~-user does not have to select one of purchase and record user control options and then select the other user control option to purchase and record said program;

on screen display means for displaying a second list representing programs selected for purchasing and recording; and

control means, in response to selection of said user control option, entering said program into said second list and automatically entering said program into said first list.

7. (ORIGINAL) The apparatus of claim 6 wherein said first list includes a timer conflict indication for programs having a timer conflict.

8. (ORIGINAL) The apparatus of claim 6 wherein said first list includes a purchase indication for said program.

9. (PREVIOUSLY PRESENTED) The apparatus of claim 6 wherein said controller first determines whether there is a timer conflict between said program and another program on said first list before entering said program on said first list.

10. (ORIGINAL) The apparatus of claim 9 wherein said controller prompts a user to resolve said timer conflict if said timer conflict exists.

11. (CURRENTLY AMENDED) An apparatus for processing a program, comprising:

user interface means for selecting said program from said plurality of programs;

an on screen user option indicating that a user can to both purchase and record said program, so that the ~~a~~-user does not have to select one of purchase and record user options and then select the other user option to purchase and record the selected program;

a controller, in response to a user action for canceling said program, removing said program from a first list representing a list of programs purchased and automatically removing said program from a second list representing a list of programs to be recorded.

12. (PREVIOUSLY PRESENTED) An apparatus for processing a program, comprising:

on screen display means for displaying a first list representing programs selected for recording;

first user control means for selecting to both purchase and record a program;

on screen display means for displaying a second list representing programs selected for purchasing;

second user control means for removing a selected program from said first and second lists; and

control means, in response to said user removal of said program from said second list, automatically removes said program from said first list.

13. (CURRENTLY AMENDED) A method for processing a plurality of programs, comprising:
- selecting a first program for recording from said plurality of programs;
 - storing said first program in a first list;
 - selecting a second program;
 - receiving a selection of a displayed user option indicating that a user can ~~for~~ both purchasing and recording of the selected second program;
 - storing said second program in a second list; and
 - storing said second program in said first list.
14. (ORIGINAL) The method of claim 13 further comprising the step of determining whether there is a timer conflict between said second program and another program on said first list before storing said second program on said first list.
15. (ORIGINAL) The method of claim 14 further comprising the step of prompting a user to resolve said timer conflict if said timer conflict exists.
16. (PREVIOUSLY PRESENTED) A method for processing a plurality of programs, comprising:
- selecting a first program for removing from a first list representing a list of programs selected for recording;
 - selecting a second program for removing from a second list representing a list of programs purchased;
 - determining whether said second program also appears on said first list; and
 - removing, automatically, said second program from said first list if said second program appears on said first list.

17. (PREVIOUSLY PRESENTED) A method of processing a program, comprising:

removing, in response to a user command, said program from a first list of programs representing programs scheduled for recording;

determining whether said program is also a purchased program; and

removing, automatically, said program from a second list of programs representing purchased programs, if said program is a purchased program.
